# Revitalizing "Social Goals" of social work (Kam, 2010)

Overly focused on pathological perspective and clinical social work (counselor role), ignoring important social goals of social work

Promoting social justice and human rights as fundamental principals

#### **§**6 Social Goals:

- 1.Concern social issues and problems
- 2. Work with marginalized and oppressed mainly
- 3.Using person-in-environment for problem analysis
- 4. Social construction perspective: blaming the systems not users as victims
- **5.Promote Social Change**
- **6.Promote Social Justice**

### Training Up Macro mindset

- 'Big-picture' perspective
- Breaking stereotype
- Strategic Vision
- Proactive vs. Reactive → (empowering)

 individuals (groups) can anticipate and react to broader social issue, rather than just focusing on tangible needs ONLY

#### How to Develop a Macro Mindset:

- Practice Openness and Space: (allow new ideas, new theories to bombard your brain)
- Focus on the Long-Term Vision:
- Break down long-term goals into smaller, manageable steps (process goals) to maintain progress and avoid feeling overwhelmed.
- Be Flexible
